

Gray Davis, Governor

STATE CLEARINGHOUSE

NEWSLETTER

February 1 through 15, 2000

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period **February 1 through 15, 2000.**

CLEARINGHOUSE CONTACTS

Please contact the Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613.
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse.html

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Katie Shulte (for projects in Northern California)
Scott Morgan (for projects in Southern California)

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

Information on EIRs and Negative Declarations that have been submitted for state agency review is currently available on the LUPIN web page at http://ceres.ca.gov/planning/eia_index.html.

The 1999 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available at http://ceres.ca.gov/planning/pub_org.html.

Federal Notices

Intergovernmental Review Notices (February 1 through 15, 2000)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below.

AGENCY: U.S. Department of Commerce

CONTACT: Leonard Smith

TELEPHONE: 206-220-7660

ADDRESS: U.S. Department of Commerce
Economic Development Administration
Jackson Federal Building, Room 1856
915 Second Avenue
Seattle, Washington 96174

DESCRIPTION:

A Finding of No Significant Impact has been issued for the Marina small business incubator complex, EDA Project No. 07-01-03850. Since the project will not significantly affect the quality of the human environment, preparation of an environmental impact statement is not required.

AGENCY: San Joaquin Redevelopment Agency

CONTACT: John Turner

TELEPHONE: 559-693-4311

ADDRESS: San Joaquin Redevelopment Agency
P.O. Box 758
San Joaquin, CA 93660

State Department of Housing and Community Development
Division of community Affairs
1800 Third Street, Suite 390
PO Box 952054
Sacramento, CA 94252-2054
Attn: John Turner, Program Manager

DESCRIPTION:

On or about February 18, 2000, the San Joaquin Redevelopment Agency will authorize the City of San Joaquin to submit a request to the State Department of Housing and Community Development (HCD) for the release of 1999/2000 Economic Development Enterprise funds grant. The grant is for a project known as the Tube Mill facility in San Joaquin for the purpose of manufacturing continuous welded tubes. It has been determined that the project will have No Significant Impact on the Environment. The State's acceptance of the certification allows the City of San Joaquin to use Program funds. Comments regarding the project can be sent to the San Joaquin address and comments regarding the release of funds can be sent to HCD.

1999041106	Las Virgenes Municipal Water District, Proposed Creek Discharge Avoidance Project Las Virgenes Municipal Water District The Draft Environmental Impact Report (EIR) evaluates the potential environmental effects associated with the implementation of alternatives identified in the Creek Discharge Avoidance Study. The study evaluates a series of actions (projects) that will enable Las Virgenes Municipal Water District (LVMWD) to comply with its current National Pollutant Discharge Elimination System (NPDES) Permit #97-135, which requires the elimination of all non-essential discharges from TWRP Water Reclamation Facility (TWRP) into Malibu Creek between 1 May and 31 October each year. The NPDES Permit also requires LMVWD to undertake a Creek Discharge Avoidance Study (CDAS) that examines alternatives to creek discharge, as well as studies of optimal flow in Malibu Creek. In combination with Creek Discharge Avoidance Study Project Report, this document fulfills the NPDES requirements for a CDAS; this document also examines the impact of redirecting non-essential discharges up to a year-round basis, as suggested (but not required) in the NPDES) Permit.	nod

2000018201	Erosion control maintenance over an existing natural gas pipeline Fish & Game #5 San Diego--San Diego The Operator/Applicant proposes to alter the streambed of the Otay River for the purposes of installing rip-rap of AJAX (pre-formed interlocking concrete control structures) to protect an existing 4-inch natural gas-pipeline housed within a 8-inch casing from past erosion and probable eventual wash-out. The existing pipeline is located near the westerly edge of a concrete pad associated with the Hollister Street b0x-culverts. The Operator proposes to excavate a 15 foot by 15 foot area to depth of 3 feet for the purpose of installing the above mentioned erosion control materials. Rip-rap or Ajax will be off-loaded into the streambed by a bucket truck that will be stationed on Hollister Street. After the rip-rap of AJAX is installed, the work area shall be returned to, as near as possible, its original contours and elevations, by backfilling the area with the excavated soils.	noe

2000011104	San Diego Gas & Electric Company Valley Center Substation CPUC Application No. 99-09016 Public Utilities Commission Valley Center--San Diego SDG&E is proposing to construct and operate the Valley Center Substation Project. The objective of the proposed Substation is to provide additional electricity to meet expected load growth and meet reliability criteria. The substation will be located on the north side of Valley Center Road, east of Cole Grade Road in the unincorporated Community of Valley Center in north-central San Diego County. The site is bordered by Vesper Road to the north and Valley Center Road to the west and south. The proposed project is a two-phase construction of a 120-megavolt ampere(MVA) substation with the loop in of the existing 69 dV transmission line. The proposed substation at full build-out is planned to have 112-MVA capacity with four 28-MVA transformers and 15, 12 kilovolt (kV) circuits. The existing 69 kV tie line will be routed in and out of the proposed site underground. The substation perimeter wall will enclose an area approximately 200' x 260'. The wall will be 10' high and constructed of earth toned, split-face block to blend with the surrounding area. Landscaping plants will be similar to those already in the area. There will be two 20' wide sliding gates at the end of the driveway leading into the substation. Construction is scheduled to begin in 2000 with an in-service date of June 2001.	neg	03/02/2000
2000011105	Santa Monica High School Improvement Project Santa Monica-Malibu Unified School District Santa Monica--Los Angeles The proposed project includes the following new construction: an additional 12 standard-sized classrooms added to the existing language building (35,925 square feet) for an increase of 13,647 square feet; a 5,388 square foot addition to Barnum Hall; and an addition of 7,419 square feet in the existing 8,656 square-foot music building. A site plan is included as Figure 3.	neg	03/02/2000

2000011099	UCLA Luck Research Center and Related Projects University of California, Los Angeles West Los Angeles--Los Angeles The University of California, Los Angeles proposes to construct a five-story laboratory facility (Luck Research Center), approximately 95,000 gross square feet (gsf) on a site east of the Life Sciences Building. The facility would require demolition of a portion of the Life Sciences Building (LSB) which houses instructional space. The project would also include construction of a smaller instruction facility, approximately 12,500 gsf to replace instructional space that would be demolished in the LSB. The Replacement Instructional Facility would be constructed upon a foundation that would incorporate a thermal energy storage tank (TES). The TES is proposed to provide additional chilled water to meet the overall campus' peak cooling demand. In order to achieve efficiencies of design and construction, the Luck Research Center would be constructed together with the proposed Health Sciences Seismic Replacement Building #2 (HSSRB#2), which was previously analyzed within the Final EIR for the Academic Health Center Facilities Reconstruction Plan (AHCGRP- SCH#97061016).	nop	03/02/2000
2000011101	City in the Hills Bakersfield, City of Bakersfield--Kern The project involves (a) an amendment to the Land Use Element and Circulation Element of the Metropolitan Bakersfield 2010 General Plan (b) concurrent zone change for an approximately 694-acre site located in the northeast portion of the City of Bakersfield, and (c) a development agreement to vest development rights. Proposed Land Use Element amendments consist of redesignation and boundary realignments of the existing Low Density Residential (> 7.26 units per net acre) designation to High Density Residential (> 17.42 < 72.6 units per net acre) and General Commercial and redesignations and boundary alignments of the existing Mixed Use Commercial and designation to High Density Residential (> 17.42	nop	03/02/2000

	<72.6 units per net acre) and General Commercial. The proposed amendments also include redesignations and boundary alignments of the existing High Density Residential (>17.42 <72.6 units per net acre) to General Commercial. Proposed zone changes for the site will correspond with the proposed Land Use Element designations. Through the development agreement or other mechanism, the maximum density of the High Density Residential zone is expected to be capped at twenty-one units per acre. Proposed Circulation Element amendments include the addition of new arterial and collector street alignments within the project site. The overall concept for the project site is primarily residential, with 72.1 percent of the site as Low Density Residential uses and 9.4 percent designated as High Density Residential (HR) uses. In addition, 14.0 percent of the site will be designated General Commercial. Approximately 4.5 percent of the site will be set aside for the ultimate right-of-way alignment of State Highway 178 (Kern Canyon Freeway).

1999112046	<p>nongame populations and to provide public sport hunting opportunities through regulated harvest.</p> <p>Elk Hunting Fish & Game Commission --</p> <p>The proposed project is intended to provide hunting opportunities for elk as an element of the Department's elk management program. It is based on allowing the take of a limited number of elk as a biologically sound management option for selected herds consistent with maintaining healthy elk populations. The proposed project implements Fish and Game Code sections 332,1801,3400-3409 and 3951 as they apply to elk management. Tule elk hunting, as a management tool, will not be authorized when the Department's statewide population estimate is below 2,000 animals. As proposed, elk hunting would be independent of other management elements, including relocating animals to suitable habitat, issuing depredation permits to alleviate property damage, providing photographic and viewing opportunities, natural history study, and interpretive programs relative to elk.</p>	eir	03/17/2000
1999112047	<p>Deer Hunting Fish & Game Commission --</p> <p>The objective of the project is to provide public hunting of deer in 44 hunting zones, 28 area specific archery hunts, 36 additional hunts, 64 PLMs and 10 fund-raising license tags with rifles, pistols, and revolvers using centerfire cartridges with softnose or expanding bullets, bow and arrow, muzzleloading rifles, and crossbows. This chapter describes proposed seasons, bag limits, number of tags, special conditions and herd statistics for the hunt areas. Additionally, information is provided on quotas, methods of take, tag application procedures and use. General zone, area-specific archery, and additional hunt area boundaries are provided in this chapter and Appendix 6. Finally, a complete review of herd size and herd performance by hunt zones are described in Table 1-1. For additional information on the proposed project, refer to the following section "Specific Project Description". The project was designed based on legal mandates, Department planning process, standard wildlife management practices and theories, and field data collected annually. The following sections describe these aspects of the project design.</p>	eir	03/17/2000

	<p>and an agricultural supply service (Section 19.14.030.D.2) in an A-1 (Limited Agricultural) District. The project site is an approximate two-acre parcel that has historically been utilized for packing assorted vegetables on a limited basis. Existing development on the site consists of a 500-square-foot office, an accessory building, an approximate 10,000-square-foot packing shed with an attached cold storage facility, and a 5,000-square-foot warehouse. The applicant is currently authorized to operate a carrot storage and packing operation on the site for three consecutive months during a one-year period. The applicant is proposing to utilize the project site for a variety of agriculturally related purposes on a year-round basis, as follows: (1) Cold storage- The existing facility would be used to store carrots and occasional loads of produce from insurance and trucking companies; (2) Carrot packing-This operation would take place in the existing packing shed and would utilize 10-15 employees from 8 am to 6 pm, 2-3 days per week. The carrots would be brought to the site once per day by a semi-truck and run down a conveyor belt where they would be sorted into bags and bins. The carrots would be culled and would already be clean when they are brought to the site (only sorting, packaging, and storing would need to be done). The operation would not provide carrots for table-ready human consumption and thus would not require sophisticated processing that includes water usage. The carrots would instead be used to feed large animals and in the manufacture of canned dog food. The pre-processing and washing of the carrots would be done by Bakersfield packing companies; (3) Welding and manufacturing-This operation would utilize 3-6 employees from from 8 a.m. to 6 p.m. , Monday through Friday and some Saturdays. A one-ton truck would make deliveries of completed projects with available customer pickup. Items to be manufactured include portable pipe corrals, dog kennels, barns, sheds, and fencing. The applicant has indicated that some of the local farmers would be contacted regarding their fencing and storage needs, but that the operation would be used mainly to contain horses, cattle, sheep, and goats; (4) Hay and feed-related storage and sales- This operation would utilize the existing warehouse located at the south end of the site. Between one and two semi-truck loads of hay and feed would be brought to the site per week and would be stored in the warehouse for delivery as ordered. The applicant is proposing to utilize a one-ton truck for deliveries which would enter and leave the site once each day. The hay would be purchased primarily from Bakersfield area growers. The existing and proposed methods of sewage disposal and water supply are an on site septic tank and the Edmundson Acres Mutual Water Company, respectively.</p>

1999021066	Interstate 5 Santa Clara River Bridge Replacement Caltrans #7 Santa Clarita--Los Angeles The Santa Clara River Bridge is located on Interstate 5 partially within the City of Santa Clarita and partially within an unincorporated area of Los Angeles County. The proposed project consists of a total replacement of the existing northbound and southbound structures with a single structure. Major degradation of the riverbed surrounding the Santa Clara River Bridge pilings has occurred as a result of scour. The bridge also has indications of superstructure problems. The degrading riverbed at the bridge site and superstructure problems have seriously threatened the integrity of the entire structure. Total replacement of the existing structure is being considered in order to secure this vital interstate transportation system which connects northern and southern California.	eir	03/22/2000

2000021015	San Diego County Courthouse Replacement Project San Diego County San Diego--San Diego The purpose of this project is site acquisition for future use of the property as a new location for a replacement courthouse facility. No construction will take place at this time; only site acquisition is proposed. The parcel for the project is 60,000 square feet in size. There are no design plans or project level plans related to the new courthouse construction. The new facility would be a high-rise building with at least 25 stories and 600,000 square feet of space above grade and three levels of parking and mechanical functions below grade. The new courthouse site would contain up to 70 courtrooms, house up to 1,200 employees and provide underground parking spaces.	nop	03/07/2000
2000021016	Chateau Arnaz Condominium Project Beverly Hills, City of Beverly Hills--Los Angeles Applications for a development plan review permit and Vesting Tentative Map for construction of a proposed three -story, 33-foot high, 23-unit residential condominium structure with parking for 69 cars provided in a subterranean garage accessed from Arnaz Drive. R-4 permits have also been requested to permit rooftop bathroom facility adjacent to a proposed jacuzzi and to permit additional walkways in the front setback.	nop	03/07/2000
2000021017	Los Arboles Townhomes (AR 99-04, TT 99-01) Ojai, City of --Ventura Applicant is proposing a 23-unit townhouse development. Previously, the site was improved with 25 single family dwellings, four of which were demolished within the past 2+- years and the remainder which were demolished in 1994. 16 units are proposed to be constructed on the west side of the street and include duplexes, triplexes and four-plex. 7 units are proposed on the east side of the street, consisting of one four-plex, and one triplex. Living space for each townhouse ranges from 1,900 to 2,800 square feet. The project site contains more than 120 trees, more than half of which will be preserved, 48 trees have been determined to be dead, diseased, likely to become diseased, or hazardous and are proposed for removal.	nop	03/07/2000
2000021021	Piers G/J Terminal Development Long Beach, Port of Long Beach--Los Angeles Development of a 320-acre container terminal that would consolidate two existing terminals. 2000028088	California Institution for Men TB/HIV Housing Engineering Controls Project Corrections, Department of Chino--San Bernardino The proposed project at the California Institution for Men (CIM) would modify the existing ventilation system to increase the number of air exchanges per hour in the HIV dormitories located in the Del Norte building. The project would include replacing the cell door windows, two air handlers for inmate cells, two recirculating packaged air conditioning units, new thermostats and controls. The existing Del Norte building is two-story housing building with centrally located dayroom, office and support spaces on both floors, and with cell wings extending to the north and south of the central spaces. Primary mechanical equipment is located in a mechanical room on the first floor level at the center of the building on the east side. There is also a basement tunnel level used for pipe and conduit distribution, and as an air exhaust plenum from cell chases that open into it. The project is needed because of the high number of HIV infected inmates at CIM who are susceptible to contracting (and transmitting) tuberculosis (TB). The project would increase the ventilation and reduce the possibility of spreading TB. The project would accommodate the existing population and involves no expansion of existing use.	noe	
2000028089	Seal and Pave Roads 2000, State Water Project Water Resources, Department of --Butte, Merced, Fresno, Kings, Los Angeles, San Bernardino The proposed contract consists of the application of various types of bituminous resurfacing over existing maintenance roadways and parking areas within the Sate Water Project. The repair is needed to maintain their structural integrity, to provide reliable access to selected major SWP facilities, and to promote the reliable delivery of Project water.	noe

	Irvine, CA, and dated February 13, 1998. The RAW was prepared in accordance with California Health and Safety Code Section 25356.1(h)(1). the RAW proposes to place as asphalt cap (parking lot) over the burn ash materials and auto-shredder waste at the site. The asphalt cap will prevent, minimize, and/or mitigate the actual and potential threats to human health and safety and the environment. This remedy is effective because it minimizes residual risks and maximizes long-term protection, minimizes short-term impacts, and increases the speed with which protection is achieved. It is anticipated that approximately 20 days will be required to complete construction of the asphalt cap. The approximate size of the asphalt paving at the Barnhart property is 18,000 square feet (0.41 acres) and at the Dantzer property is 37,800 square feet (0.86 acres).		
2000022030	City of Mt. Shasta Downtown Transportation Improvements Mount Shasta, City of Mount Shasta--Siskiyou The project involves upgrading several roadways in downtown Mt. Shasta (Chestnut St., Lake St. and Mt. Shasta Blvd.) to improve traffic circulation. The majority of the improvements will occur on Chestnut St. and will include removing and replacing the road surface, providing roadway shoulder improvements on the section between Ivy Street and Mt. Shasta Blvd., removing and replacing portions of the sidewalk and curb, installing storm drains, minor landscaping and installing a flashing beacon at the intersection with Lake St. Proposed improvements to Lake St. will include resurfacing, constructing several medians and installing a traffic signal at the intersection of Commercial Avenue. Improvements to Mt. Shasta Blvd. will include minor modifications to the existing intersection at Lake Street. Underground utilities on Chestnut Street and Jessie Street will be repaired and/or replaced as part of this project.	neg	03/10/2000

2000022032	South Sutter Water District Settlement Agreement South Sutter Water District Nicolaus--Placer, Sutter The Proposed Project consists of changes in the operations of Camp Far West Reservoir to implement the proposed Bay-Della Settlement Agreement between South Sutter Water District (SSWD) and the California Department of Water Resources which exports water from the Sacramento-San Joaquin Delta. Up to 4,400 acre-feet (AF) of water would be released from Camp Far West Reservoir (operated by SSWD) during dry and critical water years for use by the State Water Project to meet environmental and contractual obligations. The water will flow into the Delta where a portion may be exported or the entire amount may be used by DWR to meet the State Water Resources Control Board's (SWRCB) 1995 Water Quality Control Plan. The purpose of the Proposed Project is to provide for releases of water that will fully satisfy the potential obligations of SSWD and all other Bear River Water Rights Holders (represented by SS/WD) to contribute to implementing the objectives of the SWRCB's 1995 Water Quality Control Plan.	neg	03/10/2000

1999111098	Kindercare Learning Center (SDP 99-14) Carlsbad, City of Carlsbad--San Diego The project proposal consists of a Site Development Permit, Conditional Use Permit, and Coastal Development Permit to grade and construct a 9,897 square foot child daycare facility of a pre-graded in-fill lot.	nod	
2000029005	Hidden Valley Ranchos I Thousand Oaks, City of Thousand Oaks--Ventura Applicant proposes to construct 29 residential units within a 301.8 acre area of eastern Thousand Oaks, Ventura County. The project will result in impacts to Lyon's pentachaeta (<i>Pentachaeta lyonii</i>) which are protected under the California Endangered Species Act, requiring issuance of a California Incidental Take Permit (Permit).	nod	
2000028075	California State Lands Commission, as Trustee of the School Land Bank Fund Purchase of an 1+/- Acre Panel of Land California State Lands Commission Barstow--Contra Costa, San Bernardino Authorize the Purchase, with School Land Bank Funds, of a 1+/- Acre Parcel of Land.	noe	
2000028090	Phase 1- Stabilization of Sepulveda Adobe Parks and Recreation, Department of --Los Angeles The Sepulveda Adobe damaged in the 1994 Northridge Earthquake and is scheduled for restoration in accordance with the Secretary of Interior's Standards and Guidelines for treatment of historic structures. In order to protect the structure and its features from further degradation by the elements, this phase 1 project proposes to salvage, catalog and store detached historic fabric, and to brace and roof the remaining structure until the complete restoration plan can be implemented. Excavation for the placement of braces will be required. A qualified archaeologist has been and will continue to be involved in preparation of the stabilization plan and its implementation, including salvage and recordation of historic artifacts and features. No potential for significant impacts to the environment is anticipated.	noe	
2000028091	Millard Stream Water Diversion Weir Repair Fish & Game Commission Pasadena--Los Angeles Repair an existing water diversion weir within Millard Stream and resume water diversion of same. Construction will result in covering an additional 19 square feet of unvegetated stream bottom with concrete and reducing water flows downstream. Arundo removal and minimal stream flow provisions to protect aquatic resources downstream of the project will be implemented as mitigation. SAA# 5-373-99	noe

2000022037	<p>Montessori School Santa Cruz County Soquel--Santa Cruz</p> <p>Proposed to convert an existing office building to a Junoir High School for a maximum of 50 pupils and a pre-school program/day care center for a maximum of 50 children for a total maximum of 100 students. Requires an Amendment to #78-960-U. Project is located at 2645 Park Avenue west of Cabrillo College Drive in Soquel.</p>	neg	03/10/2000
2000022038	<p>Southern Humboldt Senior Care Parcel Map Subdivision and Planned Unit Development Humboldt County Planning Department Garberville--Humboldt</p> <p>The tentative map subdivision and Planned Unit Development for: 1) the subdivision of an approximate 1.26 acre parcel into two (2) parcels; and 2) the development of a senior housing complex on the parcels resulting from the subdivision. Proposed Parcel 1 will be approximately 0.58 acres in size and proposed Parcel 2 will be approximately 0.71 acres in size. The parcels will be served by community water and sewage disposal services. Parcel 1 is to be developed with twenty (20), one-bedroom units; one (1), two-bedroom manager's unit; and a community building 1,000 square feet in size. Parcel 2 is to be developed with ten (10), one-bedroom units, and a community building 500 square feet in size. Thirty (30) of the proposed units will target low income seniors. Pursuant to Section 315-4(e.4) of the Humboldt County Code, the project is proposing the modification of : 1) the twenty (20) foot exterior yard setback on Parcel 1 to allow a minimum setback of twelve (12) feet; 2) the twenty (20) foot front yard setback on Parcel 2 to allow a minimum setback of three (3) feet; 3) the twenty (20) foot setback between the front of a dwelling group to any other separate building on Parcel 2 to allow a minimum setback of ten (10) feet between the dwelling group and community building on the north side of the new right of way; 4) the twelve (12) foot setback between the front of a dwelling group to any side lot line on Parcel 2 to allow a minimum setback five (5) feet for the dwelling group on the south side of the new right of way. An exception reequest to allow a 24 foot wide off-site right of way to serve the proposed subdivision instead of a forty (40) foot wide right of way. Also, an exception request to allow a 20 to 24 foot wide on-site right of way to serve the proposed subdivision instead of a forty (40) foot right of way. The project also involves the construction of 1) on-site parking facilities; 2) on-and off-site road improvements; 3) on- and off-site drainage improvements; and 4) up-grading the existing off-site water and sewer lines on a portion of Cedar Street, and on Conger Street to Redwood Drive. Currently, the property is developed with two (2) houses and two (2) sheds. One of the residences is to be relocated to a new off-site location. The other house and one (1) of the sheds are to be demolished and removed.</p>	neg	03/10/2000

2000022048	<p>Ukiah Air Attack Base-Relocation Project Forestry And Fire Protection, Department of Ukiah--Mendocino</p> <p>The California Department of Forestry and Fire Protection (CDF) proposes to acquire a new site of approximately 12 acres, suitable for the construction of a new Ukiah Air Attack Base in Mendocino County. The current Ukiah Air Attack Base site lies within the Ukiah Municipal Airport. The proposed relocation site would serve a similar function and have similar facilities as the existing UAAB, but would include more space to allow for a needed expansion and upgrade of facilities. The base normally reloads up to eight air tankers of mixed types assigned to single or multiple fire fighting incidents. Overnight parking of four or more aircraft is not uncommon. Maximum efforts for multiple large fire operations have resulted in single-day output exceeding 80,000 gallons of fire retardant involving more than 50 air tanker trips. UAAB is the primary air attack facility in the world.</p>	neg	03/18/2000
2000021051	<p>Planning Area 17 Zone Change and Master Plan EIR Irvine, City of Irvine--Orange</p> <p>The proposed project consists of a General Plan Amendment, Zone Change and Hillside Master Plan to allow for the development of 2,375 medium density dwelling units, a K-8 school site, neighborhood community parks, a neighborhood commercial center and 1,060,000 square foot of research/industrial uses on approximately uses 795 acres. The remaining 444 acres will remain open space.</p>	nop	03/14/2000
2000022047	<p>City of Citrus Heights General Plan EIR Citrus Heights, City of Sacramento--Sacramento</p> <p>The proposed project would result in the establishment of a General Plan for the City of Citrus Heights.</p>	nop	03/14/2000
1983011104	<p>SEACLIFF ESTATES Richmond, City of --Contra Costa</p> <p>Proposal to subdivide the + 33 acre site to create a 150-lot single-family subdivision with 10 parcels of common open space, interior streets and common area improvements, in conformance with a previously approved Planned Area District rezoning that adopted a PA Plan for the project.</p>	nod	
1991103062	<p>MONTANERA PROJECT IN THE GATEWAY VALLEY Orinda, City of CONTRA COSTA--ORINDA</p> <p>The project is the November 1999 Gateway Valley (Montanera) Final Development Plan for Parcels A, B and H. This is approximately 72-acre component of the overall 978-acre October 1998 Gateway Valley Final Development Plan approved by the City of Orinda in March, 1999. It contains 109 single family residents for the entire Montanera project. The City of Orinda Planning Commission approved the November, 1999 Gateway Valley (Montanera) Final Development Plan for Parcels A, B and H on February 8, 2000.</p>	nod
